Examiner's Statement of Reasons for Allowance

The following is an examiner's statement of reasons for allowance: The prior art, Fort et al, U.S. Pat. No. 6,549,939 teaches a tagged language to be used in the calendar entry, and an agent works based on a user profile (see col. 2, lines 10-15). The claimed invention teaches a liner expression of a sum of terms which are each a product of a numerical data denoting each user's independent preferences and the expected value can be expressed as a ratio of a maximum response rate and a minimum response rate. Therefore, the prior art fails to teach or suggest a liner expression of a sum of terms which are each a product of a numerical data denoting each user's independent preferences and the expected value can be expressed as a ratio of a maximum response rate and a minimum response rate. The claimed invention is statutory because the selection of contents (as shown in claim 1) are perform by a server (see abstract) and computing of specific expected value (as shown in claim 1) is performed by information processing system. The tangible result is that the expected value can be a ratio of a maximum response rate and a minimum response rate (see claim 1, last two lines).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
